

DARSHAN H N

Java Developer | Core Java | Spring Boot | SQL | OOP | Data Structures & Algorithms

Bengaluru | +91 6360466384 | darshan.techcoder@gmail.com | **Languages Known:** Kannada, English | [LinkedIn](#) | [GitHub](#)

SUMMARY

Information Science Engineering graduate (2025) with hands-on experience in Core Java, Java Collections, Object-Oriented Programming (OOP), Spring Boot, and SQL / relational databases. Strong understanding of Data Structures & Algorithms and software development fundamentals, with practical exposure to RESTful web services, Microservices, and the full Software Development Lifecycle (SDLC) — coding, testing, deployment, and maintenance. Comfortable working to organizational coding guidelines and quality standards, supporting bug-fixing and code reviews, with working knowledge of Git, HTML, CSS, JavaScript, and cloud platforms (AWS, Azure, Google Cloud). Strong analytical, problem-solving, and communication skills; a collaborative team player eager to learn modern frameworks and grow in an enterprise Java development role.

TECHNICAL SKILLS

Languages: Core Java, Advanced Java, Java Collections Framework, Object-Oriented Programming (OOP), SQL, Python, JavaScript, TypeScript, C, HTML, CSS

Core CS: Data Structures & Algorithms, OOP, DBMS, SDLC, STLC, Software Development Fundamentals

Frameworks & Libraries: Spring Boot, Core Spring Framework, Hibernate, JPA, React JS, Angular JS, Next.js, Node.js

Databases: SQL, Relational Databases, MySQL, PostgreSQL, MongoDB, MongoDB Atlas

Backend & APIs: RESTful Web Services, REST APIs, Microservices, Backend Development, Code Reviews, Bug-Fixing, Coding Guidelines & Quality Standards

Cloud & DevOps: AWS (EC2, S3, IAM, Load Balancer), Azure, Google Cloud (GCP), Docker, Jenkins, CI/CD, Git, Maven

Practices: Agile delivery, SDLC, STLC, Testing, Application Maintenance, Production Support, Secure Coding, Linux (RedHat), Bash

Tools: Git, GitHub, VS Code, Postman, Google Workspace

PROFESSIONAL EXPERIENCE

Full Stack Developer — Archelos Intelsense Technologies Pvt. Ltd.

Dec 2025 – May 2026

- Delivered full-stack development, testing, and deployment activities using Core Java, Spring Boot, and Object-Oriented Programming principles, supporting application maintenance and production support for live applications while collaborating in Agile/Scrum sprints.
- Designed and tested RESTful web services / REST APIs within a microservices architecture, following organizational coding guidelines and quality standards; used Git/GitHub for version control and peer code reviews.
- Applied strong analytical and problem-solving skills to debug and fix production issues; used Java Collections and core data structures for efficient application logic.
- Built full-stack features using HTML, CSS, JavaScript, TypeScript, React JS, Angular JS, Node.js, SQL, MySQL, and MongoDB Atlas, with database design and SQL query development applied to schema design and query optimization.
- Mentored junior associates on project development and core Java/OOP programming fundamentals, demonstrating learning agility and supporting team-wide skill growth.

Python Data Analytics with AI Intern — MeVi Technologies

Oct 2023 – Nov 2023

- Optimized data processing pipelines across multiple projects, reducing processing time by 20% through logic refactoring and testing.
- Tested and validated data outputs with the team, ensuring accuracy and consistency across datasets.

Software Engineer Intern — Internshala Trainings

Jun 2023 – Aug 2023

- Built a full-stack Bus Reservation System (HTML, CSS, Bootstrap, React, PHP, MySQL) with authentication and seat booking, applying Agile delivery practices, OOP concepts, and relational database design.

PROJECTS

Deep Fake Detection using AI and Deep Learning | [GitHub Link](#)

- Built a deep learning model (Python, TensorFlow/Keras, CNNs) to detect manipulated video/image content, applying data structures & algorithms, data preprocessing, automated testing, and model evaluation (accuracy, precision, recall).

Educat – Full-Stack E-Learning Web Application | [GitHub Link](#)

- Developed a full-stack e-learning platform using Core Java, Spring Boot, OOP design principles, Next.js/TypeScript, MySQL, with secure authentication, RESTful API integration, and database-driven course management, following Agile practices.

Scalable Application Deployment on AWS EC2 with Auto Scaling & Load Balancing | [GitHub Link](#)

- Deployed a highly available web app on AWS (EC2, ALB, Auto Scaling Groups, IAM); implemented CloudWatch/SNS monitoring and CPU-based scaling policies, and debugged a production 502 Bad Gateway issue via the launch template.

EDUCATION

B.E. in Information Science and Engineering — CGPA: 7.69

Kalpataru Institute of Technology, Tiptur | Oct 2021 – Jun 2025

COURSES COMPLETED

AWS Cloud Computing | Java Full Stack Development | Data Analytics with Python

SOFT SKILLS

Analytical Problem-Solving | Critical Thinking | Learning Agility | Adaptability | Collaboration | Communication Skills | Teamwork | Working Under Ambiguity | Self-Motivated | Debugging & Troubleshooting | Client Success
